This program contains:
0h 45m of Professionalism content
2h 15m of Substantive content

Reunite with your construction law colleagues at this year's Symposium. This is a can't-miss event where our faculty will share helpful advice and get you up to speed on complex and challenging topics for your practice, including how to use AI to improve efficiency, critical differences between civil and construction litigation and key professionalism considerations for using AI and technology.

Register now and get the insights you need to stay at the forefront of the construction and infrastructure law field.

9:00 am Welcome and Opening Remarks

9:05 pm **How to Effectively Use AI in a Construction Law Practice****Jaspal Sangha**, Sangha Construction Law Professional Corporation (moderator)**Laura Delemere**, Borden Ladner Gervais LLP

- Locating relevant case law and communicate technical legal issues more effectively to clients
- Comparing provisions across multiple contracts to identify conflicting obligations and flag unusual risk allocation
- Building chronologies from project records

10:15 am Networking Break

10:30 am **Mastering Unique Elements of Construction Litigation****Daniel Fridmar**, Fridmar Professional Corporation

- Unpack these critical ways construction litigation differs from most civil actions:
- Key insights on conducting a section 40 cross-examination
- Handling liability shared among multiple parties through contractual indemnities, contribution claims, or negligence
- Managing multiple interrelated contracts that govern a construction dispute

11:15 am **Challenging Professionalism Issues for AI and Technology****Catherine Gleason-Mercier**, Singleton Urquhart Reynolds Vogel LLP**Max Gennis**, WeirFoulds LLP

- Protect sensitive information in relation to construction disputes
- Verifying accuracy of an AI generated contract analysis
- Issues raised by BIM protocols and model-sharing agreements
- Case law in Canada and the United States on AI hallucination cases

11:55 am Concluding Remarks

12:00 pm Program Concludes
